Software Development Operations Manager | Executive IT Architect
| BCS Fellow | Microsoft MVP Alumni | AI, Cloud, Security, Math &
Quantum | Thought Leader & Tech Speaker | DZone Core
Austin, Texas, United States

Summary

Executive with extensive experience in Management, technology architecture in the IT industry, I lead the design and onboarding of complex cloud and AI workloads for IBM's Platinum-level clients in finance and healthcare. As a Senior Software Development Operations Manager at IBM, I specialize in delivering seamless cloud transitions and optimizing mission-critical systems, leveraging expertise in SAP ASE, VSI on VPC, z Systems, VMware, and ROKS/IKS. With over 18 years of experience in software development and enterprise architecture, he brings a rare combination of people leadership and deep technical expertise to IBM Cloud Infrastructure. As a BCS Fellow and a member of the Association of Enterprise Architects, I am committed to advancing cutting-edge technology solutions. My work integrates a deep focus on cloud architecture management and strategic innovation to drive client success. My passion lies in enabling organizations to achieve scalability, security, and performance in their cloud and AI initiatives.

Experience

IBM

10 years 11 months

Software Development Operations Manager, Cloud Complex Workload Onboarding

November 2025 - Present (8 months)

Austin, TX

Software Development Operations Manager | IBM Cloud Infrastructure

In his role as Software Development Operations Manager, he leads a globally distributed engineering organization responsible for IBM Cloud's MISOP offering portfolio and AIOps capabilities. He oversees the full people management lifecycle, including talent acquisition, performance management, career

development, and organizational planning across engineering teams in multiple countries.

Concurrently serving as Executive IT Architect, he bridges day-to-day operational management with enterprise-level technical strategy, ensuring the engineering organization builds the right solutions at the right pace.

His areas of responsibility span global team leadership, engineering operations, CI/CD and delivery standards, budget and P&L accountability, and cross-functional collaboration with Product, Architecture, DevOps, and Security teams. He is also responsible for process governance and compliance alignment within IBM's Integrated Product Development framework.

He is known for developing engineers into strong technical leaders, simplifying complex engineering environments, and maintaining a delivery culture built on accountability and transparency.

Currently focused on scaling IBM Cloud's MISP portfolio, advancing AIOps capabilities, and building engineering teams that perform well and grow together.

Executive IT / Software Architect, IBM Cloud Platinum Enterprise
July 2024 - Present (2 years)

Austin, TX

Executive IT / Software / Platinum Architect | Expert in Onboarding Complex Workloads for Top 1% Cloud & AI Clients (Finance, Healthcare)

- Leading the architecture and onboarding of complex cloud and AI workloads for Platinum-level clients, specializing in industries such as finance and healthcare.

- Chief Architect, Product Owner, and Manager for SAP ASE on IBM Cloud, driving the deployment, optimization, and scaling of mission-critical systems in enterprise environments.

- Expert in designing and architecting the seamless onboarding of complex workloads and products to the cloud, ensuring scalability, security, and performance.

- Deep expertise in VSI on VPC, z Systems, VMware, and ROKS/IKS compute, enabling the migration, deployment, and optimization of large-scale enterprise applications across diverse infrastructure models.
- Security-focused with a strong background in code and vulnerability scanning, leveraging industry-leading tools like Mend, SonarQube, Contrast, Twistlock, and others to ensure secure cloud environments.
- Thought Leader and Certified Architect at L3 level, shaping strategic decisions and driving innovation across cloud and AI platforms, ensuring long-term client success and growth.
- Specialist in DevSecOps and AIOps, with a proven track record of automating security, operations, and performance management for cloud-native environments, reducing time to value and improving operational efficiency.

Senior Certified Solutions Architect, IBM Cloud Platinum Program

March 2023 - July 2024 (1 year 5 months)

Austin, Texas, United States

Cloud Architect | IBM Cloud & ISV Onboarding | Financial Services & Complex Workload Expert

- Key member of a high-performance team accelerating time-to-value and delivering seamless onboarding for IBM Cloud clients and ISVs managing complex workloads.
- Lead onboarding and validation of Platinum clients and priority ISVs in finance and healthcare, driving adoption and consumption on IBM Cloud and Watsonx.
- Design and implement client onboarding and adoption strategies, gathering market insights to improve IBM Cloud's offerings and ensure client success.
- Architect cloud onboarding acceleration patterns and guide clients on best practices for a smooth transition to the cloud.
- Lead the Managed Service Provider (MSP) program, ensuring frictionless onboarding for IBM Cloud's top-tier clients and strategic ISVs with high growth potential.

- Provide technical leadership to internal and external teams, overseeing the architecture and delivery of Cloud Infrastructure Managed Services for strategic ISVs.
- Influence product roadmaps and customize IBM Cloud for financial services, including developing Secure Landing Zones and reference architectures tailored to ISV needs.
- Mentored and judged watsonx challenge use cases, fostering innovation in AI and data-driven solutions.
- Collaborate with IBM Cloud CISO to implement risk mitigation strategies and lead the adoption of security and automation best practices for ISVs.
- Architected secured, private-only network solutions and network security designs.
- Lead automation initiatives using Terraform and Ansible for onboarding SAP databases as Software-as-a-Service offerings on IBM Cloud.

Solutions Architect, IBM Cloud Solution Engineering

January 2022 - March 2023 (1 year 3 months)

Austin, Texas, United States

- Part of the Global Cloud Acceleration Team (GCAT) now IBM Cloud Solution Engineering.
- Design and Architect solutions for onboarding customer workloads to IBM Cloud.
- Architect and automate landing zone for onboarding Financial ISVs.
- Work on a unique client workload for IBM Public Cloud by driving the adoption and consumption of IBM Cloud.
- Influence the IBM Cloud Road Map for future feature and function via an enhancement process, which is both internally and externally available.
- Design, Architect and Build reusable assets and patterns, which we generally make available to the open-source community for clients.
- Deliver architecture leveraging DevOps automation toolchains, Cloud ecosystem, and modern containerization, orchestration, and virtualizing technologies using IBM Cloud.
- Hands-on with a broad set of information technology tools, methods and architectures, architecture expertise in multiple application platforms, and an

understanding of current or future technical applications and architectures being driven by an industry.

- Develop code for solutions and client workshops, written in different languages such as Node.js, Python, Go, and Java to highlight functionalities of the IBM Cloud products.
- Build relationships with customer and jointly architect solutions that bridge the customers desired goals with IBM Cloud capabilities.
- Provide development teams with a deep review of their upcoming new product to ensure consistency with the IBM Cloud platform in order to identify missing features and to compare with similar products in the cloud landscape.
- Develop solutions from the customer's perspective leading a small team of solution developers focused on multiple key accounts.
- Identify opportunities and define plans to grow and accelerate customer's Cloud presence and increase the IT infrastructure stability and reliability.

Senior Product Manager, Cloud Portfolio Solutions & AI

April 2021 - January 2022 (10 months)

India

- Architect, draft, and publish IBM Cloud solution tutorials to simplify customer onboarding on latest cloud offerings like Virtual Private Cloud, Kubernetes, and AI services.
- Design, code, and draft customer scenarios to match the real-world client use- cases.
- Build competitive analysis to compare IBM Cloud products, highlighting gaps and opportunities.
- Provide development teams with a deep review of their upcoming new product to ensure consistency with the IBM Cloud platform in order to identify missing features and to compare with similar products in the cloud landscape.
- Develop code for solutions and client workshops, written in different languages such as Node.js, Python, Go, and Java to highlight functionalities of the IBM Cloud products.
- Support sales activities by recommending best practices to adopt for new cloud projects, by identifying the best path to migrate existing legacy applications to modern cloud-native microservices architecture.
- Enable System integrators and Startups by recommending the right IBM Cloud services to solve problems.
- Present at international Conferences covering Cloud, AI, DevOps, and Mobile.
- Explore new IBM Cloud & AI paradigms, programming languages, and technologies

like OpenShift, Serverless, Microservices.

- Speak at conferences to present IBM products to clients and developers.
- Explore cloud use-cases and come up with code samples in different programming

languages like JavaScript, Python, GO, Java for Android, C#, Swift using multiple

IBM Cloud services.

- Code use-cases with multiple IDEs like VSCode, PyCharm, Sublime text, Android studio, XCode for external developers.
- Publish technical blog posts and articles around IBM Cloud and AI technologies on IBM cloud blog and other blogging platforms like DZone, Medium.com
- Automation of cloud service provisioning using tools like Terraform and Ansible.
- Maintain code in Git & follow Agile methodology for task management and daily Scrum with the team.

Technical Product Manager & Developer Advocate | IBM Cloud & AI
October 2017 - April 2021 (3 years 7 months)

India

- Explore latest IBM Cloud offerings and building Cloud Solutions around the services.
- Draft, review and publish IBM Cloud solution tutorials.
- Provide feedback to the respective IBM Cloud product teams for a better product release.
- Analyze what the competitors are up to and create a backlog for the product team.
- Code use-cases using the IBM Cloud and publish to sub-version tools like Git for external developers.
- Enable System integrators and Startups on IBM Cloud.
- Present at Conferences covering Cloud, AI, DevOps, and Mobile.
- Developed a voice-enabled Android chatbot with IBM Watson assistant, text-to-speech and speech-to-text services on IBM Cloud.
- Designed and developed a text analysis with Natural Language Understanding

application that uses a serverless backend.

- Developed native Android and iOS mobile apps that uses a serverless backend.

The application is a feedback app that smartly analyses the Tone of the feedback provided and appropriately acknowledges the customer through a Push Notification.

- Explore new cloud & AI paradigms, programming languages, and technologies.
- Awarded IBM eXtra miler award for promoting IBM Cloud through blog posts, articles, and conference presentations.

Cloud Offering Manager for Developer Productivity | Developer Advocate

July 2016 - September 2017 (1 year 3 months)

Bengaluru Area, India

- Promote the use of IBM Cloud & Watson services through technical enablements.
- Enable developers to use Containers, Serverless Computing, and Swift@IBM on IBM Cloud.
- Speak and present at local and international conferences around Swift@IBM, serverless computing.
- Publish technical articles and blog posts around IBM Cloud and Swift@IBM.
- Explain IBM Cloud and its uses to developers through user demonstrations, recorded demonstrations, and the creation of sample projects.
- Designed and developed a web application using financial services on IBM Cloud.
- Developed an iOS application using Swift@IBM as the backend for demonstration purposes. The app is an insurance bot that answers insurance-related queries.
- Handled Asia-Pacific customer technical enablement & engagement.

MobileFirst Developer Evangelist

August 2015 - June 2016 (11 months)

Bengaluru Area, India

- Promote the use of the IBM MobileFirst platform by actively answering developer queries.
- Enable Android, iOS, and hybrid mobile app developers on IBM MobileFirst platform through user demonstrations, recorded demonstrations, and the creation of sample mobile projects.

- Demonstrate the use of the IBM MobileFirst platform as a mobile backend for notifications, usage metrics, and database connectivity.
- Speak and present at local and international Mobile technology conferences.
- Designed and published a conference app to Cloud Foundry on IBM Cloud.
- Conducted workshops to guide a team of developers to move their hybrid banking mobile application backend to MobileFirst platform.
- Publish technical articles and blog posts around the IBM MobileFirst platform.

BCS, The Chartered Institute for IT

BCS Fellow

June 2024 - Present (2 years 1 month)

<https://www.bcs.org/membership-and-registrations/become-a-member/bcs-fellowship/>

AEA - Association of Enterprise Architects

Member

April 2024 - Present (2 years 3 months)

Dell R&D

Software Development Staff Engineer

May 2014 - July 2015 (1 year 3 months)

- Develop .Net applications for Dell customers, analyze requirements and work with multiple internal teams for on-time delivery of requirements.
- Developer on Dell e-commerce application especially Dell support module.
- Code new support modules using Microsoft Technology stack like C#, ASP.net MVC, Web API, and entity framework.
- Explore and use the latest technologies like AngularJS, HTML5.
- Development using best practices like unit tests, agile, and scrum methodology.
- Worked on Android mobile App, MongoDB Proofs-Of-Concept to scan bar codes on Dell laptops for easy troubleshooting.
- Analyzed product performance on a regular basis and ensure timely closure to critical production issues.
- Collaboratively solution the features by closely working with team lead, product manager, UX, and Architects.

- Migrated the legacy ASP.net application to ASP.net MVC and AngularJS.
- Awarded Dell Silver Award – Breakthrough Thinker for innovation in design and development.
- Organize internal Hackathons for Dell employees.

INDECOMM

2 years 3 months

Technical Lead

April 2013 - May 2014 (1 year 2 months)

Part of Indecomm Global Services

- Lead a team of Mobile (iOS/Android) app developers
- Designed and developed an ASP.Net MVC 4 Web API application that acts as a backend data service for Android and iOS Mobile apps reading data from Microsoft Azure Storage.
- Designed and developed a social media backend API that pulls Facebook metrics through Graph API and Google Analytics dimensions and metrics through the management and reporting APIs.
- Awarded as Indecomm Top Gun Award for innovation and Excellence.
- Implemented authentication and authorization using OAuth 2.0 for secured communication between the application and the backend APIs.

Senior Software Engineer

March 2012 - March 2013 (1 year 1 month)

Worked on Facebook Graph API and Google Analytics Reporting & Management APIs.

Worked on Azure Cloud Web Application.

Worked on ASP.NET MVC4 WEB API for Mobile.

Aptean India

Software Engineer

November 2009 - March 2012 (2 years 5 months)

Part of CDC Software

Developer for Pivotal CRM smart client application using C#, ASP.Net, and other Microsoft technology stack.

- Developed both desktop and web applications using Visual Studio IDE.
- Provided technical support for legacy applications like epartner and eservice thin

client applications for the customers.

- Part of a team that strictly followed Agile and scrum methodology through daily stand-ups, sprint planning, and retrospective meetings using tools like Rally.
- Worked on the design of Microsoft Azure proof-of-concept for the cloud version of the smart client application.

Tech Mahindra (formerly Mahindra Satyam)

Software Engineer

July 2007 - November 2009 (2 years 5 months)

Hyderabad / Vishakapatnam / Bengaluru

Worked as a team member in FIFA-EMS(World cup 2010) ,Prestigious Satyam Project,ICL

Worked as a .NET/SQL Developer,SHAREPOINT/TFS Admin
